

Port-IT and Lemur Maritime sign partnership to deliver Port-IT cyber security solutions to the Greek shipping sector.

Piraeus, Greece – July 21, 2017 Port-IT an specialised Cyber Secured Maritime Business IT Supplier has signed a strategic partnership agreement today with Lemur Maritime based in Piraeus, Greece, to deliver Port-IT digital cyber security solutions to the Greek - Cyprus shipping sector.

Port-IT and Lemur will work together with their customers to address cyber security email threats. Services will include antivirus Protection, Crew mail, Dashboard monitoring, Unified threat management solution, state of the art firewall solutions, file storage and their newly introduced cyber secured service: Orilla Mail.

Orilla Mail is a low cost solution for the shipping industry but a very secured one. It is the only software that can scan incoming email messages with over 55 different antivirus products thus reducing the change to get a virus onboard to zero by means of email.

Oil tanker managers and owners will be pleased to hear that the partnership will also help them address the newly introduced element 13 and cybersecurity related KPIs. **Bulk Carrier Owners** will be pleased to know that this will help them address the issues of Vetting for software/firmware procedures.

Youri Hart, Managing Director Port-IT stated

“We believe in working together to offer the market the best available solutions, thus signing an agreement with a company that has the same idea seems a logical choice we look forward to a positive partnership with Lemur”

Kostas Sismanidis, Managing Director Lemur stated ‘We believe that today current needs to use the data connection for email that you prefer, the potential of the multiple mail boxes, the sophisticated antivirus protection, and the low cost solution offers the Greek and Cypriot ship owners a unique tool to keep your emails safe from infection and an ability to offer your crew free email accounts.

About Port-IT

Port-IT Netherlands based has over 15 years of experience in all kinds of land mobile and maritime communication and IT solutions. We focus on cyber security and connectivity solutions for the maritime market although we also deliver generic onboard IT support. Our goal is to offer the maritime industry cost effective solutions that they actually need and not sell just another solution that does not meet the customer requirements.
